

## Lighting

Hikrobot light source, covering ring-type, bar-type, flat-type, dot-type, line-scan-type, coaxial-type and other series., covering ring light source, strip light source series and line light source series. Designed with new product family style, is efficient and stable, can meet the needs of most conventional visual lighting applications.

Higher Illumination Brightness, Better Optical Performance

Multi-size design, strong adaptability

## Ring-Type Lighting

### Standard Ring-Type Lighting

MV-LRDS-H standard ring-type lighting, provide various sizes, irradiation angles specification and model, built in high-quality LED, while ensuring lighting concentration, improve inside dissipation design, ensure that the lighting works stably and efficiently.

**CE RoHS**

# ■ Linescan-Type Lighting

MV-LTDS-H industry linescan-type lighting series adopts high brightness and high power LED, Center illuminance ≥ 1 million lux, combination of structural heat dissipation and fan heat dissipation, provide good heat dissipation and working life, flexible installation, efficient focusing. Extension liNE: the body does not have a line, and the powerline accessories with appropriate length are selected according to the demand. Best working distance: 10-200 mm

## Specifications

Model	Dimension (Length*Widge*Hight)	Emitting surface dimensions(Length*Widge)	End cap size	Power Consumption	Weight	Connector type	Label

MV-LW-H-015-1-19M8A	Cable, 19M-8A to 19M-8A, 15m length.

## ■ Dot-Type Lighting

### Standard Dot-Type Lighting

MV-LDSS-H standard dot-type Lighting, adopts special light guide and highlight LED lamp bead. new shape and heat dissipation design, constant-current drive, ensure light source has more lasting stability and service life. Best working distance: 65~200 mm.

## Spotlight Dot-Type Lighting

MV-LDFS-H spotlight dot-type lighting, & MV-LDFM-H high brightness dot-type lighting, through special optical lens structure design, cooperate with bright LED light beads to achieve high-spotlight, high-uniformity circular direct lighting effect. small and compact size, constant-current drive, suitable for lighting shooting in scenes with limited installation size and narrow space. Best working distance: 65~200 mm

## Light Controller

Hikrobot MV-LE series light controllers cover MV-LE100 analog constant voltage series, MV-LE200 digital constant voltage series and MV-LE201 digital constant current series by now with brand new family style design, stable and reliable performance, compatible with all light source product series.

Stable Performance, Easy to Control

## Digital, Constant Voltage Light Controller

MV-LE201 digital light controller supports a variety of variable current control mode of light source. It adopts control panel buttons and display screen, and provides serial port or network interface communication. It has features of stable performance and flexible functions. The digital light controller helps users realize fast and convenient deployment of light source on site.

Equipped with Professional Tools & Accessories
